Biodiversity Toolbox Webinars

In June 2022, IDFC released its **Toolbox on Biodiversity** to introduce the conceptual foundations for understanding the role of biodiversity for financial institutions.

To help the Club's members as well as any Development Finance Institutions, KfW coordinated Knowledge Sharing online Webinars to integrate the challenges of integrating biodiversity into the strategies and operations. This toolbox is a source of inspiration for its users and facilitate a continuous exchange of knowledge and experience. The sessions should be useful for both newcomers to the topic and established professionals.

While Biodiversity is becoming one of the key topics for the economic avec financial sectors, there are no blue prints yet on how Public Development Banks should address and integrate Biodiversity adequately. Therefore, the IDFC Biodiversity Working Group has put together a collection of state-of-the-art-tools, papers and practices which can assist IDFC members and more broadly any PDBs to understand and integrate biodiversity into their own institutions.
