

Getting Countries to Net Zero – Lessons from Deep Decarbonization Pathways in Latin America

COP25 side event concept note

Monday 9th December, 11:30-12:30, IDFC Pavilion

Jointly organised by IDDRI, IDB, AFD, and 2050 Pathways Platform

Description:

This event brings together representatives from countries, development finance institutions, and think tanks to discuss benefits, opportunities and lessons learned from developing long-term, net zero strategies in Latin America. The panel will also highlight key findings from the report from the Inter-American Development Bank: *Getting to Net Zero Emissions*, on their project in support of a group of Latin American countries on their ‘deep decarbonisation pathways’ released December 3.

Format:

Each panelist will give a short (five minutes) presentation followed by an audience q&a.

Participants:

- Dr. Amal-Lee Amin, Head of the Climate Change and Sustainability division, Inter-American Development Bank
- Damien Navizet, Head of Climate division, Agence Française de Développement (AFD)
- Laura Secada Daly, Director General of Climate Change and Desertification, Ministry of Environment, Peru
- Richard Baron, Executive Director, 2050 Pathways Platform
- Sebastian Treyer, Director, Institute for Sustainable Development and International Relations (IDDRI)
- Costa Rica (TBC)

Outline:

5 min	Intro: Richard Baron, 2050PP – State of play of LTS
5 min	Sebastian Treyer, IDDRI – Key findings of new Getting to Net Zero paper
5 min	Damien Navizet, AFD – Role of DFIs in supporting long-term strategies
5 min	Dr. Amal-Lee Amin, IDB - Lessons from deep decarbonisation pathways for policymaking
5 min	Felipe de Leon, Costa Rica (TBC) - Experience in the development of its decarbonization plan

IDDRI

IDB

5 min	Laura Secada Daly, Peru – National experience with LTS
30 min	Moderated Q&A
