

# Supporting Long-term Strategies: Lessons and Implications for Development Banks

**AFD - Agence Française de Développement , co-organized by IDDRI**

**10 November, 14:00 – 15:30**

Development banks have a major role to play in catalysing and redirecting global public and private investment in support of transitions towards low-carbon and climate-resilient development. For this purpose, establishing long-term low emission and climate-resilient development strategies (LTS) is a useful tool to mobilize increased and sustained financial flows. Yet, there is a lack of information on what the scope and format of an LTS should be, leading to a low countries' engagement towards LTS.

Making LTS a reality requires increased support from governments and development banks, and wider knowledge sharing around country experiences on how to shape and implement an LTS. The event will draw some lessons from various countries currently engaged in a LTS process supported by the 2050 Facility, bringing together representatives of governments, development banks, think tanks, international organizations and NGOs.

## Speakers

- François-Xavier Duporge, AFD
- Ramya Natarajan, CSTEP
- Patricia Campos, MIINAE
- Jairo Quiros, University of Costa Rica
- Abdelali Attioui and Taoufik Oukessou, Ministry of Economy and Finance of Morocco
- Antoine Godin, AFD
- Cuong Tang The, Ministry of Natural Resources and Environment of Viet Nam
- Etienne Espagne, AFD
- Alex Saer, Ministry of environment and sustainable development of Colombia (MADS)
- Sergio Gusmão Suchodolski, ALIDE

Moderated by Richard Baron
