

Structuring of Climate Projects Preparation Fund for the WAEMU States

BOAD – Banque Ouest Africaine de Developpement, co-organized by the WAEMU Commission

2 November, 14:00 – 15:30

Project preparation funds are used to finance feasibility studies and technical assistance in order to prepare future investment projects, mainly with climate co-benefits. Structuring such funds can provide WAEMU member's states with innovative financial solutions geared towards non-reimbursable technical assistance resources for projects that enable adequate management of natural disasters, mitigation and adaptation to climate change.

This side-event will raise awareness around the challenges of obtaining project preparation funds in WAEMU states and will identify potential partners to support the structuring of the fund technically or financially.
