

Southeast Asia Energy Transition Dialogue: Challenges and Opportunities to a Low Carbon Pathway in the Region

Southeast Asia Energy Transition Partnership

4 November, 09:00 – 10:00

This side event dialogue will deliver a panel dialogue and discussion session on the challenges and opportunities to a low carbon energy system in the Southeast Asia region; and the key role of international support to help the region achieve the ambitious Nationally Determined Contributions targets. It will discuss the most significant and imminent challenges for energy transition, and key innovative takeaways from the global experience to unlock pathways to a low carbon growth future in the region.
