

# The Amazon: Integrated Actions for Sustainable Development

**BNDES - Banco Nacional de Desenvolvimento Econômico e Social**

**12 November, 11:30 – 13:00**

Outstretched across 9 countries in South America, the Amazon biome is a region distinguished by superlatives, yet posing various social and environmental challenges. Joint actions are needed to reconcile development and quality of life while reducing pressure on the environment. Dialogue among financial institutions, including regional, countries of the region and state and local governments will bring important insights to coordinate agendas and find synergies.

This side event discusses the various, multi-layered challenges present in the region and raises awareness about the need to work together in partnerships and integrated actions to reduce deforestation and achieve a sustainable development in the region.
