

IDFC GFC Readiness Project – State of Play and Next Steps

IDFC – International Development Finance Club

12 November, 14:00 – 15:30

The IDFC GFC Readiness Project has the dual objective of (1) building the capacity of Direct Access Applicants and Accredited Entities amongst the members of the IDFC to make them fit for GCF co-funding, and (2) establishing strategic frameworks for guiding and developing climate-related project pipelines.

In the first part of this internal session, we will share an update on the progress of implementation so far as well as an open exchange between the Project Management Team (PMT) and the IDFC participants. Part two of the event will allow to jointly identify ideas for GCF concept notes, which may also be considered for the two multi-country concept notes to be developed as part of the IDFC GFC Readiness Project.

This session is an internal event mainly addressed to IDFC DAEs benefitting from the project, however it is open to all IDFC members.
